Introduction

WELCOME TO THE PRE-ASSESSMENT DATA SCIENCE MCQs TASK!

Task 0 is designed to assess your foundational knowledge of essential Python and data science concepts. It serves as a baseline evaluation of your existing understanding of these fundamental areas.

SOME THINGS TO KEEP IN MIND

Don't be concerned if some of the concepts seem unfamiliar at this stage – it's completely normal. Answer all the questions to the best of your ability, even if you're unsure about certain topics. This assessment is a starting point, and as you progress through the programme, you'll likely notice a significant improvement in your understanding. Use this as a valuable learning experience, and remember that growth comes with time and practice.

Don't worry, the score you achieve on this pre-assessment won't impact your ability to progress in the bootcamp in any way. It's simply a tool to help us understand your current knowledge and tailor the learning experience accordingly.

Practical task

To access the multiple-choice questions (MCQs), find them by [following this path](#).

Once there, complete the questions to demonstrate your understanding of the fundamental Python and data science concepts.

Be sure to submit your form once completed.

Once you have submitted the form, select “Request Review” on your dashboard. While your answers will not be reviewed, selecting it will mark the task as complete.
